

Loho Christopher Dondo

Mathematics Lecturer • Software Engineer • Cybersecurity Researcher

Ph.D. Candidate | Applied Mathematics & Cyber Resilience

📍 Skyline University Nigeria, Kano 📞 +234 812 600 0659 ✉ lohochris@gmail.com

🌐 [linkedin.com/in/lohochristopher](https://www.linkedin.com/in/lohochristopher) 🐙 github.com/lohochris

Professional Profile

Interdisciplinary expert bridging pure mathematics, full-stack engineering, and cybersecurity. Currently pursuing Ph.D. in Applied Stochastic Processes while actively lecturing at Skyline University Nigeria. Published researcher in reliability engineering and AI-driven security systems with multiple industry certifications.

Education

Bayero University Kano <i>Ph.D. in Applied Mathematics (In Progress)</i> Research Focus: Applied Stochastic Processes, Renewal-Reward Theory, and Reliability Engineering Key Areas: Delay Time Analysis, Weibull Modeling, Infrastructure Risk Assessment	Kano, Nigeria 2025–Present
Bayero University Kano <i>M.Sc. in Applied Mathematics</i> Specialization: Stochastic Modeling and Delay Time Analysis	Kano, Nigeria 2021–2024
University of Agriculture Makurdi <i>B.Sc. (Ed.) Mathematics/Computer Science, Second Class Upper (Honours)</i> Core Areas: Mathematical Modeling, Algorithm Design, Data Structures	Benue, Nigeria 2014–2018

Professional Experience

Skyline University Nigeria <i>Lecturer of Mathematics</i> - Deliver advanced courses: Calculus I–III, Differential Equations, Linear Algebra, and Mathematics for Economists (avg. class size: 45 students) - Supervise undergraduate research projects; 2 students pursuing graduate studies in computational mathematics - Integrate computational tools (MATLAB, Python, R) into mathematical modeling coursework, improving student engagement by 75% - Course coordinator for Calculus II, developing assessments and maintaining grade consistency	Kano, Nigeria Feb 2025–Present
INFORTECHMATICS HUB <i>Founder & Principal Consultant</i> Research & Innovation: Leading R&D initiatives in cybersecurity, AI-driven threat intelligence, and stochastic systems for digital resilience Mathematical Modelling: Developed proprietary renewal-reward models for infrastructure risk assessment, reducing failure prediction error by 95% Cybersecurity Solutions: Conducted 25+ VAPT assessments for SMEs; implemented threat detection systems preventing 95% of simulated breach attempts AI & Automation: Built Billy AI triage system (92% accuracy) and automated client reporting pipelines saving 30+ operational hours monthly Web & Application Development: Delivered 8 production applications including CyberSafe Nigeria (10,000+ users) and Footprint Manager (200+ beta users) Data Analytics: Created business intelligence dashboards for 5 client organizations, enabling data-driven growth strategies	Kano, Nigeria 2023–Present
ASHA International Model School <i>Mathematics & Web Development Instructor</i>	Kano, Nigeria 2021–2025

- Designed integrated curriculum combining secondary mathematics with web development (HTML, CSS, JavaScript)
- Achieved 78% improvement in mathematics pass rates through computational thinking integration
- Led project-based learning; 45+ students built functional math tools and interactive quizzes
- Mentored 12 students admitted to computer science programs (2023–2024)
- Founded coding club and annual "Math + Code" hackathons for 80+ participants

Holy Cross Catholic School

Badawa, Kano

Vice Principal of Academics & Mathematics Teacher

2016–2021

- Directed academic operations for K-12 institution (600+ students), managing 25+ teachers and 15 support staff
- Increased WAEC mathematics credit pass rate from 51% to 85% via data-driven interventions
- Implemented teacher mentorship program reducing faculty turnover by 40% within 18 months
- Redesigned examination system, reducing grading discrepancies by 60% through standardized rubrics
- Chaired Academic Committee; led curriculum reform aligning with 21st-century skills
- Secured 3 grants totaling ₦2.5M for STEM lab equipment and teacher training

Technical Competencies

Mathematics: Stochastic Processes, Renewal-Reward Theory, Reliability Engineering, Delay Time Analysis, Weibull Modeling, Markov Chains, Queueing Theory

Software Development: React, Node.js, TypeScript, Python, MATLAB, R, Tailwind CSS, Vite, Git, Vercel, AWS (basic)

Cybersecurity: Digital Footprint Analysis, AI-driven Threat Triage, Privacy-by-Design Architecture, Vulnerability Assessment, Penetration Testing (VAPT)

Research & Academic: LaTeX, Scientific Writing, Peer Review, Grant Writing, Conference Presentations, Curriculum Design

Certifications & Professional Development

Federal Ministry of Communications, Innovation & Digital Economy

3MTT Cybersecurity Programme, Certificate ID: FE/23/46127319

2025

- Federal Government's 3MTT Initiative - Cyber Security track
- [Verify Certificate](#)

ALX Africa

ALX Software Engineering Programme, Programme ID: EM028

2025

- 4-month intensive program in Back-End Web Development
- [Verify Certificate](#)

CLEMWEB

Cybersecurity VAPT Internship

2025

- 3-month internship in Vulnerability Assessment & Penetration Testing
- Hands-on experience with security assessment methodologies
- [Verify Certificate](#)

eHA Academy

eHealth Africa Training

2025

- 16-week advanced training in Web Development
- **Award:** Best Project (Software) - Outstanding innovation and technical skill
- Focus: Advanced JavaScript and modern frameworks
- [Verify Certificate](#)

IBM & Coursera

IBM Professional Certificates

2025

- Developing Front-End Apps with React ([Verify](#))
- Developing Back-End Apps with Node.js and Express ([Verify](#))

CWW Tech Africa

Web Development Certificate, Excellent Grade

2024

- Comprehensive web development training program
- Awarded with "Excellent" distinction
- [Verify Certificate](#)

Excelerate & Saint Louis University

Data Visualization Virtual Internship

2024

- Powered by Excelerate in partnership with Saint Louis University
- Data visualization and analytics certification
- [Verify Certificate](#)

Bayero University, Kano

ICT Tools for Postgraduate Success Workshop, Participant

2026

- CNPS Postgraduate Workshop on digital research tools
- Academic productivity strategies and AI tools for research
- [Verify Certificate](#)

Selected Projects

React, Node.js, Vercel

Lead Developer & Mathematician

[Footprint Manager](#) (Digital Privacy Platform)

2026

- Architected a digital footprint analysis tool for the 2026 UK privacy landscape, integrating official ICO and ONS benchmarking data.
- Engineered an edge-computed risk engine to quantify PIVA (Privacy Impact Vulnerability Assessment) scores and user typologies.
- Developed a personalized strategy roadmap for footprint minimization, serving over 200 active users in beta.

React, Tailwind CSS, Vercel

Lead Developer & Security Researcher

[CyberSafe Nigeria](#) (Digital Literacy Platform)

2026

- Created Nigeria's first cybersecurity resource tailored for middle-aged adults, translating complex risks into simple English and Pidgin.
- Developed culturally relevant scam scenarios and actionable guidance, addressing the 67% of Nigerians who have encountered online fraud.
- Built a fully mobile-first, accessible platform trusted by over 10,000 Nigerian users for financial and identity protection.

React, Security APIs

Lead Threat Analyst & Developer

[CyberGuard](#) (Thintelligence Platform)

2026

- Designed a human-centered security "thintelligence" platform to educate users on modern threats like SIM-swaps and AI voice clones.
- Integrated real-time threat alerts, currently displaying live warnings about 'Bank Upgrade' SMS scams targeting OPay and PalmPay users.
- Framed the platform as a "Cyber-Commander's" dashboard, gamifying the learning of scammer tactics.

Full-Stack, Render

Systems Architect

[Sunmac Academy](#) (Educational Platform)

2026

- Currently deploying a full-stack educational platform to enhance mathematical and computational learning (currently undergoing maintenance).
- Focus on integrating backend services to support interactive course delivery and student management.

MERN Stack, Render

Lead Back-End Engineer

[MediFlow](#) (Healthcare Management System)

2026

- Architected the backend authentication and data models for a smart healthcare management system.
- Built user flow for secure patient registration and login, preparing the platform for clinical data integration.

Research Publications & Presentations

2026: (Under Review)

"Optimal Replacement Policies for Deteriorating Infrastructure Using Renewal-Reward Processes," *Journal of Applied Probability* 2025: "Weibull-Modulated Delay Time Analysis for Pipeline Risk Assessment," presented at ICONDACOM International Conference, Kano, Nigeria

2025: (Working Paper)

"Stochastic Modeling of Cyber Incident Triage: A Renewal Theory Approach to Security Operations"

Professional Memberships

- Nigerian Mathematical Society (NMS)
- Institute of Electrical and Electronics Engineers (IEEE) – Cybersecurity Special Interest Group
- Association for Computing Machinery (ACM)

Awards & Recognition

2025: **Best Project (Software)** – eHealth Academy Award for outstanding software innovation([Verify](#))

2026: **Google DeepMind x Kaggle Hackathon Participant** – Stochastic Executive Function track

Teaching Statement

Bridge abstract mathematical theory with practical engineering applications, emphasizing computational thinking and security-aware design. Every equation should connect to a real-world system, and every system should be evaluated for resilience.

Tools & Technologies

- **Languages:** Python, JavaScript/TypeScript, R, ○ **Frameworks:** React, Node.js, FastAPI, Express, MATLAB
- **Math Tools:** LaTeX, Stan, Jupyter, NumPy/SciPy ○ **DevOps:** Git, GitHub Actions, Vercel, Docker
- **Security:** Wireshark, Nmap, OWASP, VAPT ○ **Design:** Markdown, Figma, Obsidian
